

Testen der Grammar

1. Erstelle Implementierung der DSL

```
org.lunifera.metamodel.dsl.jpa |
org.lunifera.metamodel.dsl.jpa.GenerateJpa.mwe2 |
rechte Maustaste | Run as | MWE2 Workflow
```

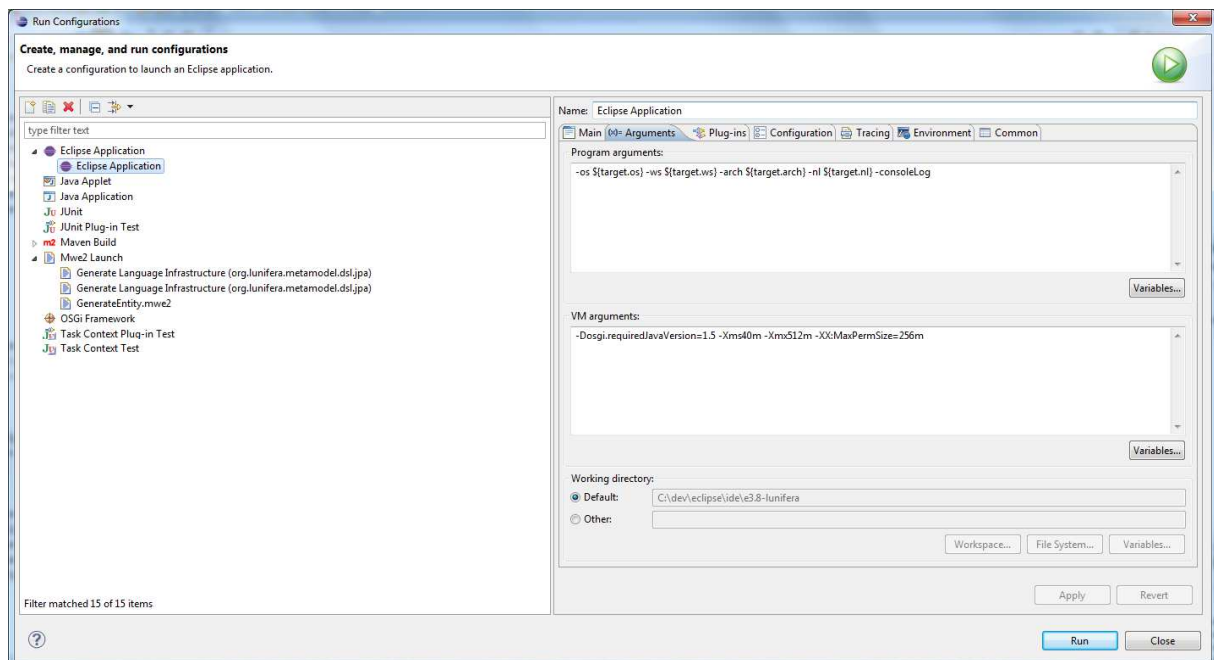

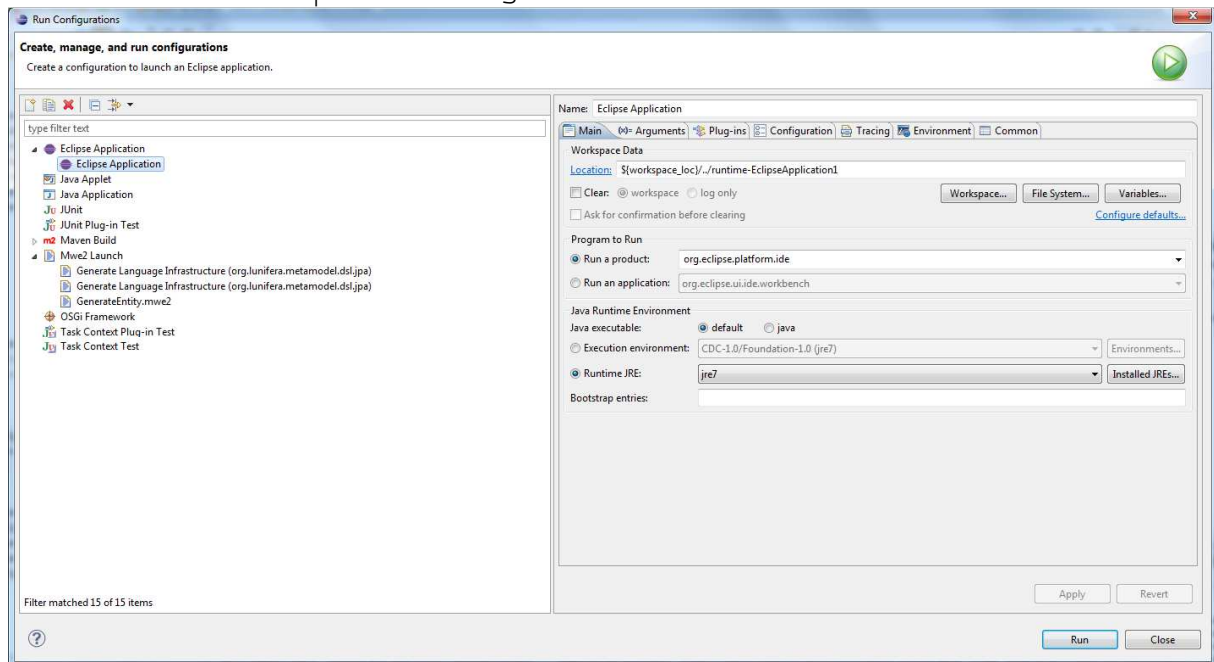

Beachte: Dauert ca. 2 Minuten
Fertig sobald in der **View Console** die Meldung **Done** erscheint

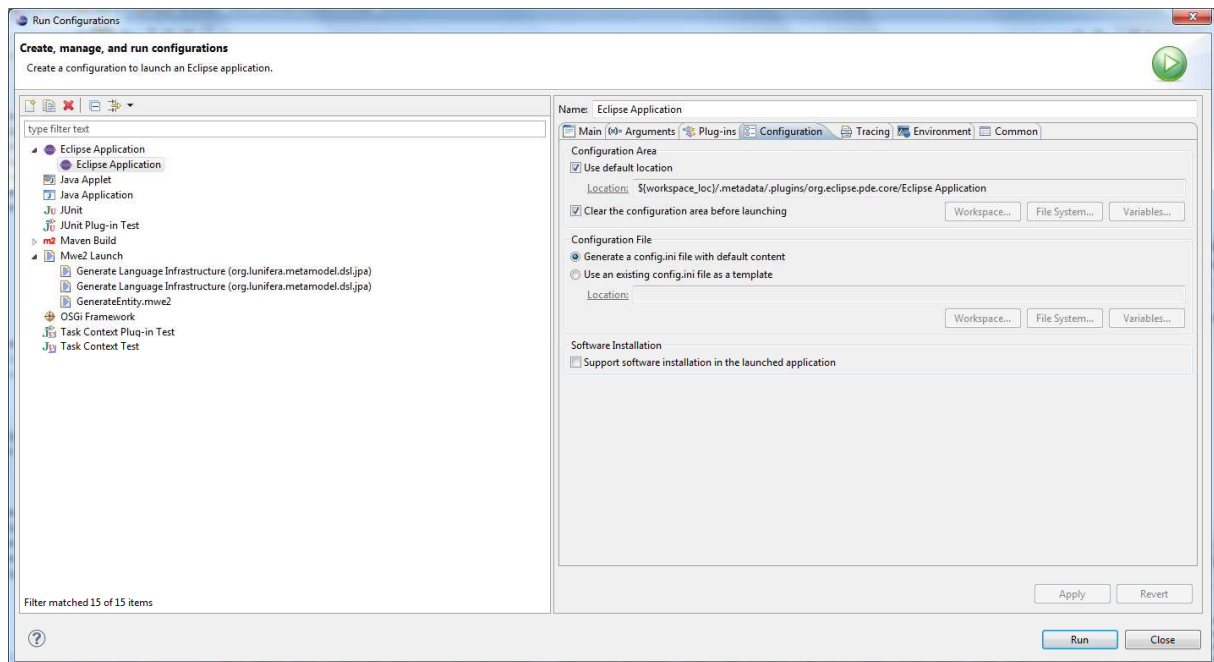

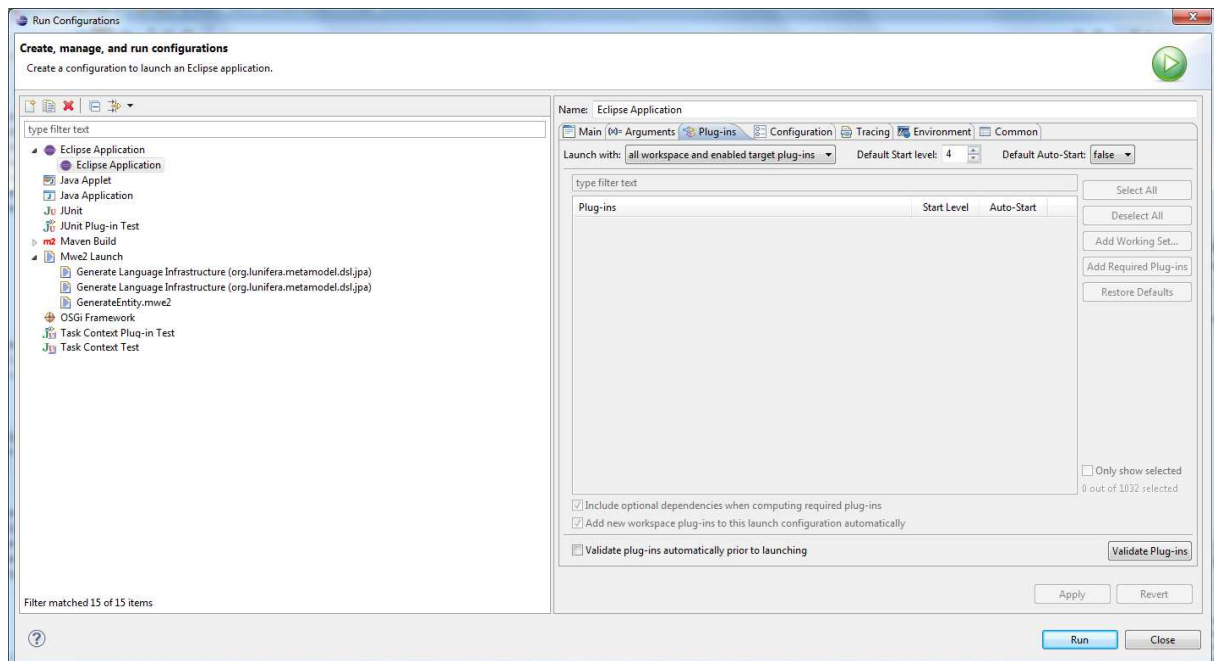

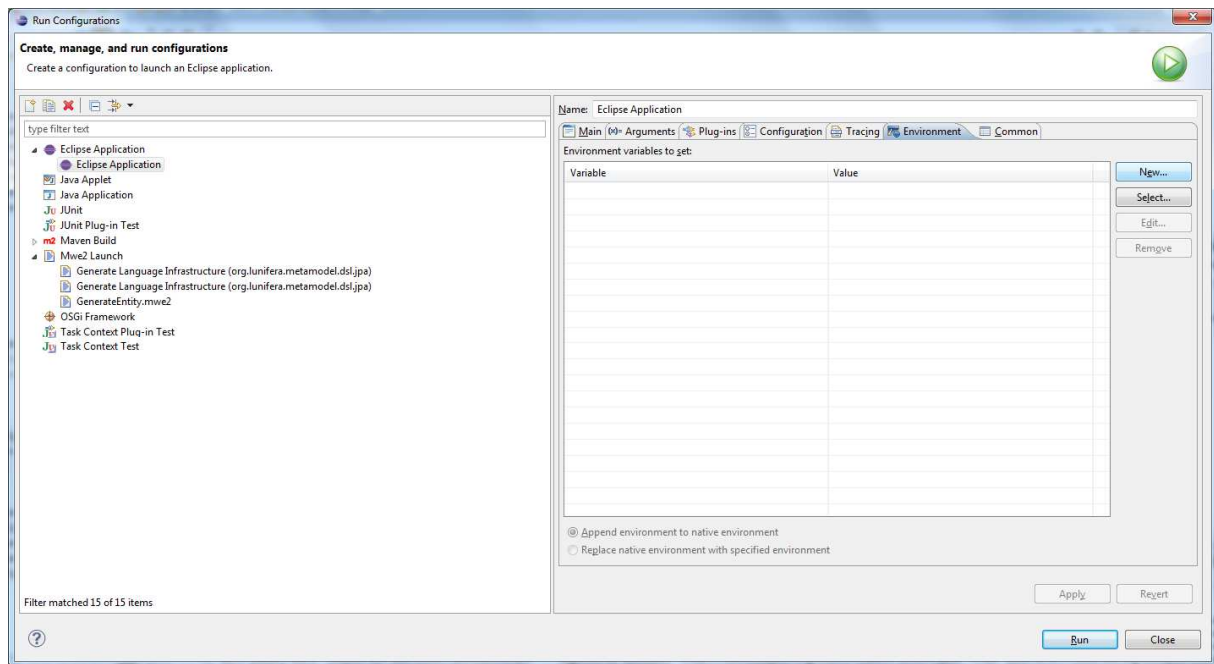

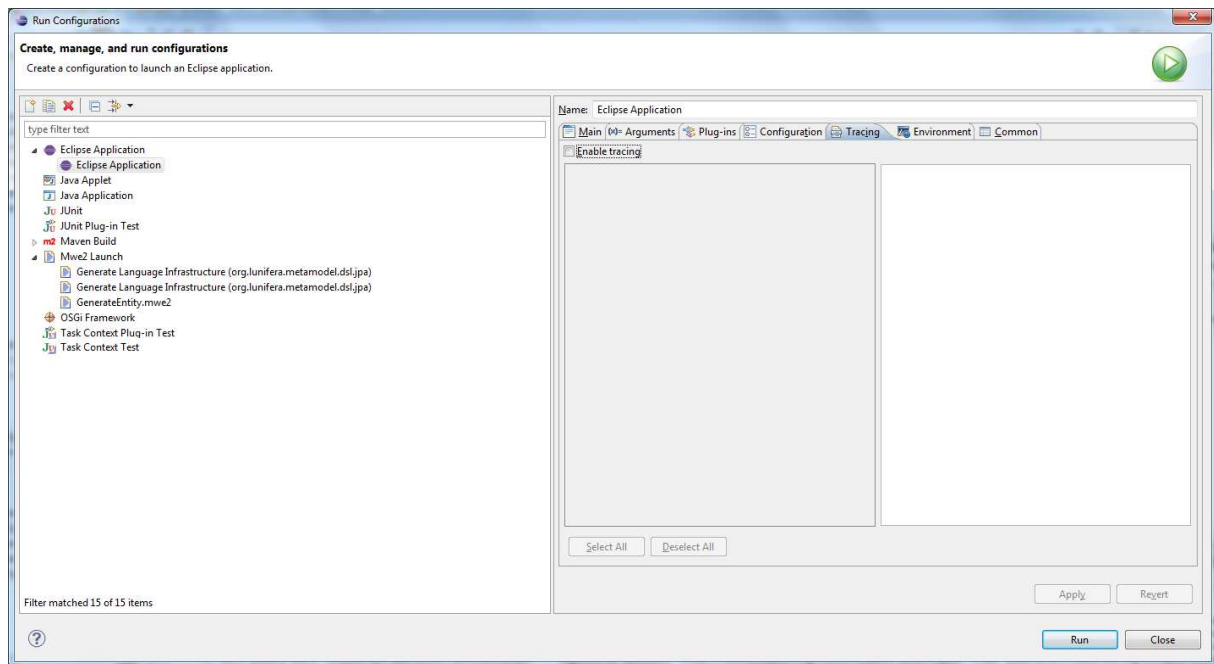

2. Testen der DSL

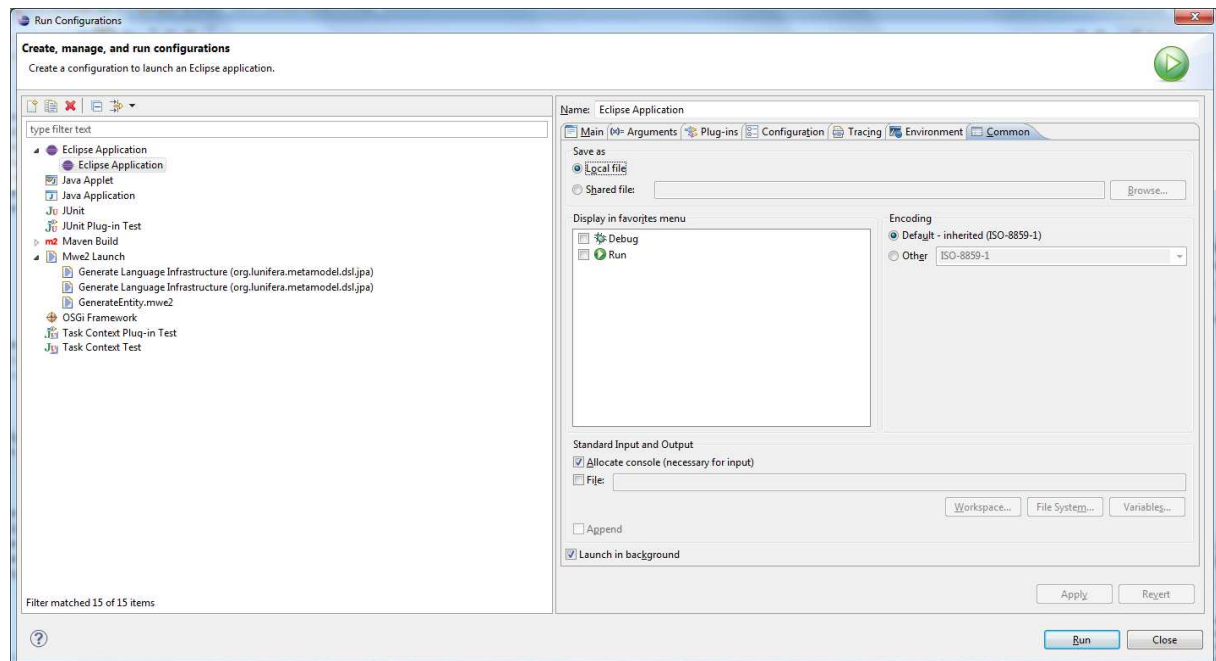

```
org.lunifera.metamodel.dsl.jpa |  
org.lunifera.metamodel.dsl.jpa.GenerateJpa.mwe2 |  
rechte Maustaste | Run Configurations...
```

Beachte: `-Dosgi.requiredJavaVersion=1.5 -Xms40m -Xmx512m -XX:MaxPermSize=256m`

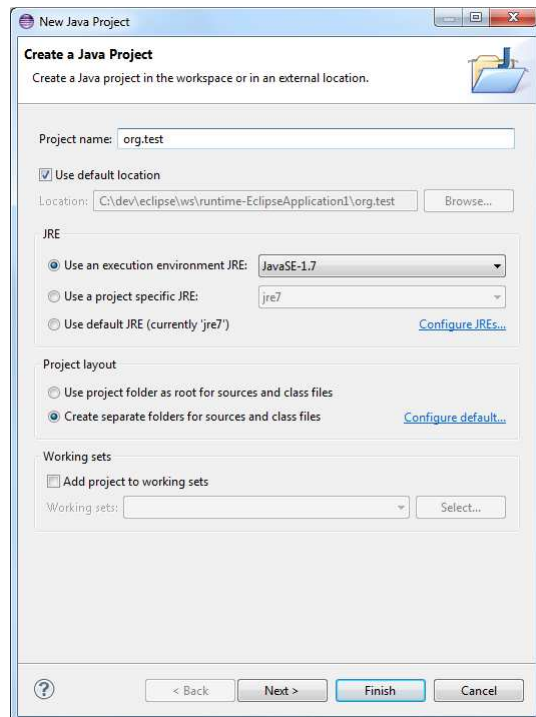

- Button: <Run>

- **Fazit: startet eine neue Instanz von eclipse**

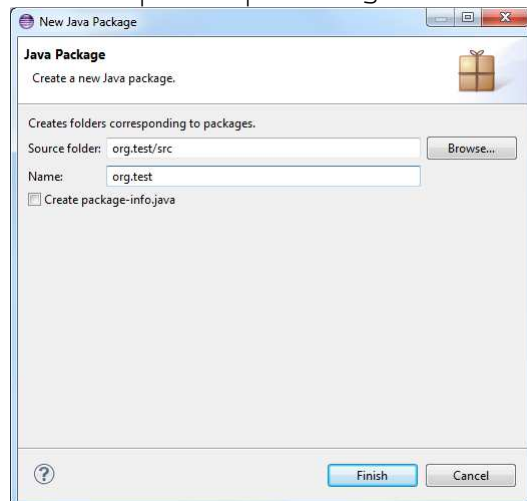

3. Erstelle neues Projekt mit der DSL

neue Instanz von eclipse | File | New | Java Projekt

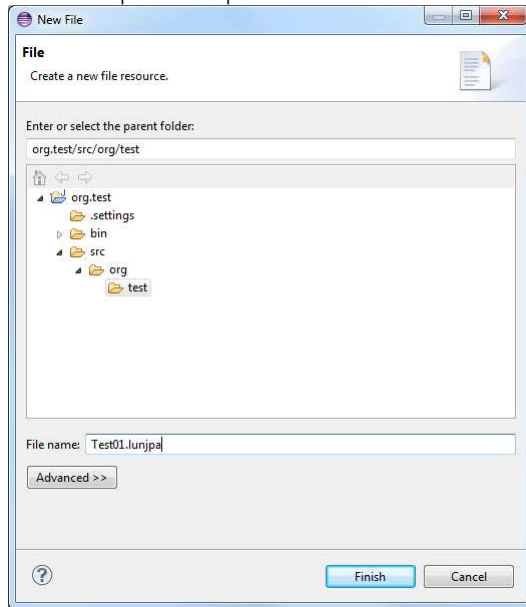

- Button: <Finish>

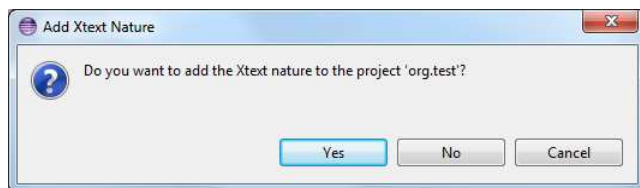

- File | New | Package

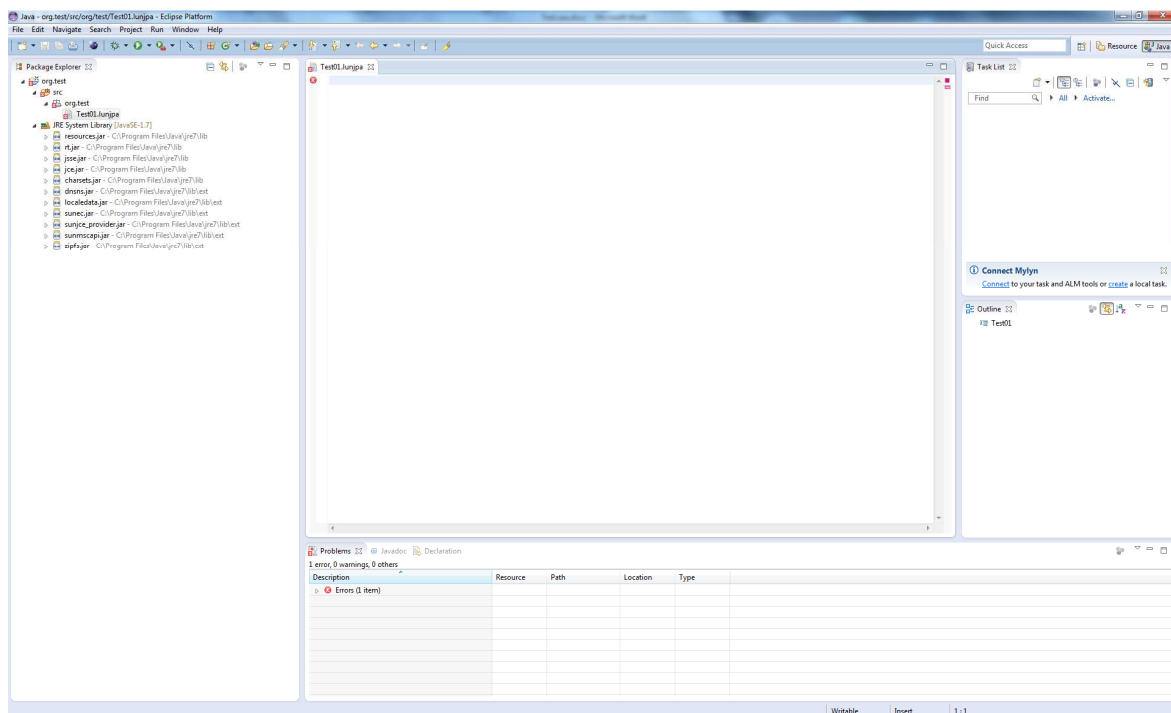

- File | New | File

Achtung: Dateierweiterung **lunjpa**

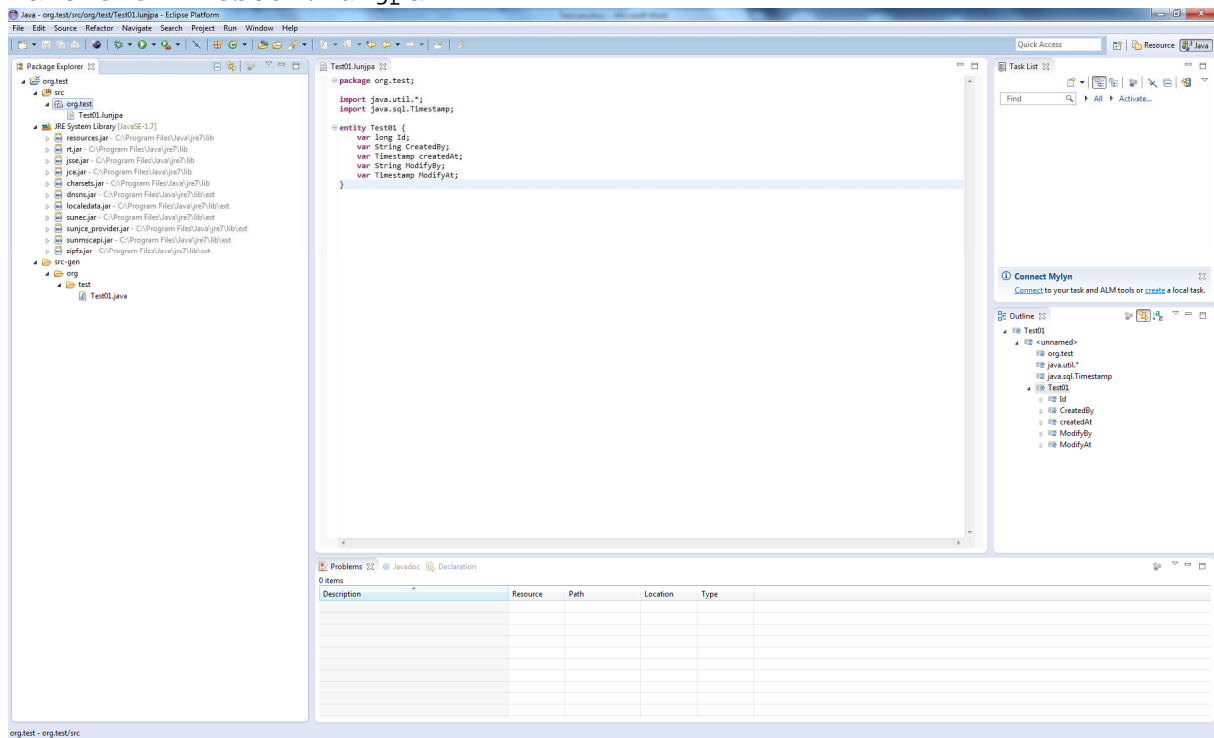

- Button: <Yes>

Fertig

4. Testen der DSL

Editiere: Test01.lunjpa

- Beim Speichern legt er automatisch folgendes an: src-gen/org.test.Test01.java

Erstelle & Editiere: Test02.lunjpa
